

Research Study for Infants with Down Syndrome

USC Health Sciences Campus
1540 Alcazar St., Los Angeles
Free parking provided

PURPOSE: To learn about the development of walking with mobility devices in infants and toddlers with Down Syndrome

WHAT IS INVOLVED: Tests of your child's motor skills and observation of your child taking steps on a treadmill and with a mobility device

WHO CAN PARTICIPATE: Children with Down Syndrome (10-22 months of age) who cannot walk independently

COMPENSATION: Families will receive \$25 per 60-90 minute lab visit (up to 5 visits).
